Training Kits Support

Medical Support for Viking Explorers 2025-26 from MSOS Ltd

The rally will depart in early January 2026 and give participants the chance to cross the Atlantic as part of a small close knit fleet supported by the organisers. MSOS are very happy to support the Viking Explorers with a personal, effective and integrated package of medical support.

Medical support comprises of three components: Medical kits, specialist medical training and telemedical support. Together, these three components form a robust support service that will prove invaluable in the event of medical mishap in remote offshore locations.

We have put together the following discounted package specifically for Viking Explorers.

- **Telemedical support** covering the period from the beginning of the adventure in January 2026 from Gran Canaria to the completion in Grenada.

Cost for a 6-month Telemedical Advice contract: £900

Cost for a 12-month Telemedical Advice contract: £1200

- **Distant Ocean Medical Kit** – It is housed in either two Pelicases or two soft bags, depending on client preference.

Cost of Distant Ocean Medical Kit: £2175

There are additional options for augmenting the basic kit, with elements such as Sting Treatment kits, Crew Day Med kits, paediatric kits, oxygen kits, defibrillators etc.

Total package discount 12.5%

Both elements of the support package must be ordered to qualify for the package discount. For MSOS to supply medical kits, the vessels must provide a copy of the vessel registry and a valid skippers licence (yacht master or equivalent).

- **Specialist medical training** – MSOS recommend a four-day course (MCA Medical First Aid (MFA) Course). This was the course undertaken by many of the ARC & ARC+ participants and a majority of the Oyster World Rally fleet. Courses are held at MSOS HQ in Saxon Wharf, Southampton. MSOS also provides classroom training in Antibes, Palma and Fort Lauderdale. Training can also be provided on-board a client vessel and be tailored for specific client requirements. Costs for these other classroom courses and bespoke courses can be provided on request.

Cost of MCA MFA course held in Southampton: £550 per person

MSOS can also arrange customised support for vessels who have particular requirements, or who have their own plans prior or after the rally.

All prices exclude VAT and delivery.
